

Dr. Platts-Mills is an Associate Professor of Medicine in the Division of Infectious Diseases and International Health at the University of Virginia. His research focuses on the application of molecular diagnostics to the epidemiology of enteric diseases in children in low- and middle-income countries. This work has helped define the etiology and burden of diarrheal disease and the impact of early enteric infections on child growth and development. He serves as a diarrheal disease expert for the Global Burden of Disease Study, sits on a WHO working group on enteric diseases burden estimation, and with colleagues at the CDC and WHO, co-founded the Global Pediatric Diarrhea Surveillance network.
