

Bio - Veronica Denti

Veronica Denti coordinates Gavi's Pneumococcal and Rotavirus vaccine programs, bringing together technical partners and assisting countries to navigate Gavi support.

In response to the ongoing expansion of WHO PQed and Gavi-supported rotavirus vaccines options, Veronica has been strengthening efforts to pool together data and tools to make it easier for NITAGs and EPIs to run evidence-based comparisons.

Veronica serves on the Steering Committee of WHO's CAPACITI, on the Advisory Board of IVAC's CHOICES initiative and on the Global Forum on Childhood Pneumonia, where she recently spurred forward a sub-group to focus on accelerating access to pneumococcal vaccination worldwide.

Veronica holds a MSc from Bocconi University and an MBA from INSEAD.
